Job Market Paper

Where Do Protests Win or Lose Votes? Exposure and Participation in the George Floyd Movement

This paper asks how protests affect voting in the neighborhoods where they take place and in those where their participants live. Combining 7,920 geocoded George Floyd protest events with mobile phone location data, I measure for each block group in American metropolitan areas its exposure to nearby protests and its residents' participation. I then exploit differences in exposure and participation across block groups within the same zip code to estimate the effect of each on the change in vote shares between the 2016 and 2020 presidential elections. Neighborhoods near protest sites saw increases in Republican vote share, a backlash that decays with distance and is larger near violent protests. Neighborhoods whose residents attended protests saw increased Democratic vote share, a mobilization that comes from participation in nonviolent protests. Results are similar in a difference-in-differences design that follows the same neighborhoods across the presidential elections from 2012 to 2024, in which the two groups did not move apart before the protests. The effects coexist: the backlash is large but concentrated in the neighborhoods near a protest, the mobilization small but spread across many neighborhoods. Participation moved about 137,000 votes toward the Democrats, while exposure near protest sites cost them about 87,000; adding the imprecise effect of exposure farther away, the net is not distinguishable from zero. Through their direct local effects alone, the George Floyd protests are unlikely to have decided the 2020 presidential election.

Awards

Dean's Dissertation Completion Fellowship, USC — $21,218 2026–2027
Lusk Center for Real Estate Research Award, USC — $13,500 2026
Lusk Center for Real Estate Research Award, USC — $15,000 2025
Dan James Fellowship, USC — $40,000 2024–2025
Summer Research Award (x4), USC — $4,000 each 2023–2026

Employment

European Central Bank, Frankfurt, Research Intern 2019
European Commission, Brussels, Economic Analyst 2017–2018

Research Positions

Research Assistant to Augustin Bergeron, USC 2023
Research Assistant to Ruben Durante, Pompeu Fabra University 2020–2021
Research Assistant to Vincenzo Galasso, Bocconi University 2019–2020

Teaching

Teaching Assistant, University of Southern California Fall 2022–Spring 2024
Introduction to Econometrics (ECON 318), undergraduate
Political Economy and Economic Development (ECON 436), undergraduate
Intermediate Macroeconomics (ECON 305), undergraduate
Macroeconomic Analysis and Policy (ECON 501), master
Teaching Assistant, Bocconi University 2019–2020
Welfare and Politics, master
Economics of European Integration, master
Political Economics, undergraduate
European Economic Policy, undergraduate

Presentations

2026: USC Development Seminar, Harvard Graduate Student Workshop in Political Economy
2023–2026: USC Applied Micro Reading Group

Summer Schools

Summer School in the Economics of Migration, UC Davis 2024
ACES Summer School in Political Economy, UC Berkeley 2023

Academic Service

Co-organizer, Southern California Graduate Conference in Applied Economics
University of Southern California 2023

Research Grants

Weiss Fund Research Grant — $5,000 2023–2024

Software Skills

Python, R, Stata, MATLAB

Languages

Italian (native), English (fluent)

Citizenship

Italian (US F-1 visa)
